

Creepy Crawly SPOOKY SPARKY SLIME

Grab a grown-up and make spooky slime for your “friends!”

What you need

- 1 bottle of Elmer’s Glue (we used 4 oz. of glitter glue)
- 1 cup water
- 1 teaspoon Borax
- 1 tablespoon water
- Plastic bugs or googly eyes

What to do

1. Have a grown-up mix 1 teaspoon of Borax in 1 cup of water.
2. Pour the Elmer’s Glue into a separate bowl. If you use white glue, add some food coloring.
3. Add 1 tablespoon of water to the glue and mix together.
4. Slowly pour the Borax mixture into the bowl with the glue.
5. Mix together with your hands.

To share with friends, put some slime in containers, add a creepy spider or some googly eyes, then **PRINT Sparky’s Slime Labels** and tape or tie around the container.

Sparky’s Tip: Note: This project should be done with a grown-up and is not edible.

Lots of candles are used for decorations at Halloween time. Make sure you stay away from any lit candles. Remind grown-ups to **blow out** candles when they leave the room.
